**RE: Onondaga Lake -- Syracuse, NY  
Joint Request for Information**

Dear Mr. Daigle:

This is in response to your Joint Request for Information regarding the Onondaga Lake Site in Syracuse, New York, received by General Electric Company ("GE") on July 25, 1994. Although this Joint Request limits its inquiries to facilities located within a fifty mile radius of the Onondaga Lake shoreline, please note that GE has restricted its investigative efforts, to only those facilities which fall within this geographic boundary, as well as to facilities in which the company has access to both the documents and individuals that would enable GE to satisfactorily respond to this request. Accordingly, GE contends that Martin Marietta Corporation should submit a response relating to activities at the Electronics Park Facility, a former General Electric manufacturing plant sold to Martin Marietta in 1993, as part of Martin Marietta's purchase of GE's Aerospace business. Pursuant to the terms of the GE Aerospace transaction agreement, Martin Marietta assumed the custody and control of the records concerning the Electronics Park facility, and currently employs the individuals that may possess knowledge germane to this request. In the following responses, the questions are restated and the answers are indented and italicized following each question.

401897

1.a. State the correct legal name and address of your company.

*General Electric Company  
3135 Easton Turnpike  
Fairfield, CT 06430*

1b. Identify the State of Incorporation of your company and your company's agent for service of process in the State of Incorporation and in New York.

*General Electric Company is Incorporated in New York State. The Corporation Trust Company ("CT System") is GE's agent for service of process in all states but New York and Pennsylvania. General Electric has no agent for service of process in New York State.*

2. State the name(s) and Address(es) of the President, The Chairman of the Board, and the Chief Executive Officer of your Company.

*John F. Welch Jr.  
Chief Executive Officer &  
Chairman of the Board  
General Electric Company  
3135 Easton Turnpike  
Fairfield, CT 06430*

3. If your company is a subsidiary or affiliate of another corporation, or has subsidiaries, identify each such entity and its relationship to the company, and state the name(s) and address(es) of each entity's President, Chairman of the Board and Chief Executive Officer.

*A copy of General Electric's Annual Report for 1993 is enclosed (Attachment #1).*

4. List all of your facilities which generated, handled, transported, treated, stored or disposed of hazardous substances, hazardous wastes, or industrial wastes which are, or were formerly, located within fifty miles of any point along the shoreline of Onondaga Lake. For each such facility, state its name and address, and period of operation. Please identify any of your facilities that are no longer in operation within this area.

*Apparatus Service Center  
Hiawatha Blvd.  
Syracuse, New York  
Operation Dates: 1965 - 1976*

*Apparatus Service Center  
5990 East Molloy Rd.  
Syracuse, New York 13211  
Operation Dates: 1976 - 1993*

5. Indicate the nature of the operations for each facility identified in Question 4 above. If the operations changed, indicate the nature of those changes (including any name changes) and the dates the changes took place.

*Apparatus Service Center (both locations): engaged in the repair of industrial motors, generators, switchgear and other electrical apparatus and conducted general machine shop work.*

6. For each facility identified in your response to Question 4 above, provide a detailed process/mechanical description of the processes used, the wastes generated from such processes, and the volume or weight of such wastes. If the process and/or waste streams changed, indicate the nature of the changes (including volumes) and the dates the changes took place. For each such waste stream provide any analyses that you have of the chemical composition of the waste stream.

*Apparatus Service Center (both locations):*

*Processes used: disassembly of equipment, cleaning of parts, replacement of parts, machining of parts, reassembly of equipment, painting of equipment, and testing of equipment.*

*Waste generated: The disassembly of equipment and replacement of parts and, to a lesser extent, the machining of parts resulted in the generation of scrap metal. The cleaning of parts was done with steam, solvents, or grit blast methods. Steam cleaning resulted in waste water which may have contained limited amounts grease and oil, traces of metals, and miscellaneous other materials found on the parts. Waste water analyses for the East Molloy Road facility are detailed in the Waste Water Discharge Permit Application, which is enclosed as Attachment #3. Solvent cleaning resulted in spent solvents and rags containing solvents. The spent solvents contained materials cleaned off the parts. Grit blast cleaning resulted in grit blast materials containing metals and other materials cleaned off the parts.*

*GE has no detailed information concerning the chemical composition of the waste stream prior to the advent of RCRA in 1980. Copies of hazardous waste manifests for materials shipped from the facility for the years 1988-1994 are enclosed as Attachment #2. General Electric has been conducting an exhaustive search to locate the hazardous waste manifests for the years 1980 - 1988. The East Molloy Road facility closed in 1993, and archived records may have been discarded. If additional documentation is located, General Electric will supplement this response accordingly.*

7. Explain in detail the manner of transportation or disposal of the hazardous wastes, hazardous substances and industrial wastes generated, handled, treated or stored at the

facilities identified in your response to Question 4 above. Provide a separate response for each facility identified in your answer to Question 4 above.

*Apparatus Service Center (both locations): Waste water was discharged to the POTW via public sewer systems. Metal scrap was transported by truck to scrap dealers. General waste was transported by truck to disposal facilities, such as landfills, where such wastes were disposed of. With respect to hazardous waste disposal practices after RCRA's effective date, hazardous waste was transported by truck to permitted disposal facilities as evidenced by the copies of hazardous waste manifests for the periods therein. Records do not exist with respect to earlier periods.*

8. For each type of hazardous waste, hazardous substance, and industrial waste material listed above, provide the names and addresses of all transporters and disposal facilities used, and state when each such transporter and disposal facility was used. Please identify the total volume or weight of such material that was transported by that entity or individual to each such disposal facility.

*Apparatus Service Center (both locations): Records do not exist with respect to early periods. The names of transporters and disposal facilities for the years 1988-1994 are identified in copies of the hazardous waste manifests, provided in Attachment #2. Hazardous waste manifests were located for the years 1988-1994. As stated in the response to Question 6, GE has been unable to locate manifests for the years 1980 - 1988.*

9. State whether any hazardous substance, hazardous waste or industrial waste, as those terms are defined in Instructions 11-13, was ever released or discharged into the environment at your facility. If yes, provide the following information.

*Apparatus Service Center (both locations): GE has no information or knowledge sufficient to form a belief as to whether GE ever released any hazardous substances, hazardous wastes or industrial wastes into the environment at either facility.*

a. If this was a continuous or intermittent practice or event, identify the period of time during which this practice or event occurred and the hazardous substances and the quantity that was released or discharged and to where was discharged. (In addition to a description of the discharge location, the discharge location should be shown on a map of the area and enclosed with your reply).

b. If there was no continuous or intermittent practice or event of release or discharge, specify the date of each incident, the hazardous substances and the quantities that were released or discharged.

c. If any of the hazardous substances released would have entered either directly or indirectly (e.g. through surface runoff or groundwater migration) into Onondaga Lake or its tributaries.

10. Was any of the material described in your response to Question 9 treated prior to direct discharge into the Lake or one of its tributaries, or pretreated prior to discharge into a municipal sewerage system which discharges to the Lake or a tributary to the Lake? If so:

*Apparatus Service Center (both locations): GE is not aware of any discharge to Onondaga Lake or its tributaries. GE does not know whether the POTW, which received the company's waste water, discharged into Onondaga Lake or its tributaries. To the extent that the POTW did discharge into the Lake or its tributaries, GE makes the following answers:*

a. describe the treatment or pretreatment process and capacity and whether discharges were continuous or intermittent;

*A gravity oil-water separator was used in the pretreatment process; the discharge was intermittent.*

b. the years during which treatment or pretreatment occurred, including date treatment or pretreatment began, and whether discharges continue or date of cessation of discharges continued;

*GE does not know whether the Hiawatha Blvd. facility had any pretreatment capacity. Pretreatment at the East Molloy Facility, as described in Answer 10 a., took place from 1972 - 1993, and is now discontinued.*

c. the quantities of influent waste treated or pretreated;

*Discharges occurred several times a week in small quantities, relating to the part cleaning processes. The 1993 Waste water Discharge Permit Application indicated intermittent discharges of 10 gallons/minute for 20 minute durations. Average daily flow, on days when discharges occurred, was estimated at 1000 gallons.*

d. the quantities and composition (chemical analysis) of treated or pretreated material discharged;

*The composition of the materials discharged to the POTW was primarily water, which probably contained limited amounts of oil and grease as well as trace amounts of various substances normally found on industrial*

*equipment. The 1993 Waste water Discharge Permit Application for the East Molloy Road facility contains the chemical analyses of the discharge to the POTW (Attachment #3).*

e. whether the material discharged directly into the Onondaga Lake, a tributary of the Lake or into a municipal sewerage system which discharges to the lake or a tributary of the Lake.

*The material was discharged to a POTW.*

f. how you disposed of any sludges or residues generated by the treatment or pretreatment process; and

*Sludges and residues from the oil water separator were pumped out and transported by truck to disposal facilities.*

g. provide the location of discharge and, if applicable, the name of the municipal sewerage system to which the discharge was made.

*The name of the POTW is:  
County of Onondaga  
Department of Drainage and Sanitation  
650 Hiawatha Blvd. West  
Syracuse, New York 13204-1194  
Contact: Joe Mastreano, Program Manager*

11. Identify all persons and other entities, including yourself, who determined how to treat, store, and/or dispose of hazardous wastes, hazardous substances, and industrial wastes generated at the facility. Provide the names and current addresses of all individuals who participated in such determinations.

*The following individuals were managers of the Syracuse Service Center Facilities. It is usually the responsibility of the service manager to make decisions regarding waste treatment and disposal.*

<i>Hayes, W.A.</i>	<i>1965 - 1969</i>
<i>Danzis, H.R., Jr.</i>	<i>1969 - 1970</i>
<i>Harrigan, P.B.</i>	<i>1970 - 1972</i>
<i>Muscella, J.F.</i>	<i>1972 - 1977</i>
<i>Salapka, W.</i>	<i>1977 - 1988</i>
<i>Battle, M.</i>	<i>1988 - 1993</i>

*Mr. Salapka is still employed by GE at the following address:  
5035 Peachtree Industrial Blvd., Chamblee, GA, 30341.*

*Mr Battle is still employed by GE at the following address:  
650 Franklin St., Schenectady, NY, 12305.*

12. Identify all of the sources of the information contained in your answers to questions 6-10. Provide copies of all documents that relate to your answers including, but not limited to, invoices, manifests, hazardous substances, hazardous and industrial waste data and analyses or characterizations and contracts, or agreements with transporting, treatment, storage, or disposal facilities.

*The sources of information used to answer questions 6-10 include the records of the General Electric Company, in addition to discussions and interviews with John Muscella, William Salapka, and Joseph Babick.*

13. Provide copies of all applications for Refuse Act Permit Program, National Pollutant Discharge Elimination System Permits, and State Pollutant Discharge Elimination System Permits, including any waste analyses or characterization submitted with such applications. Provide copies of all permits issued and all amendments to said permits. Provide copies of all Notices of Violations, or administrative or judicial complaints, concerning such discharges submitted or filed by federal, state, county, or municipal governments and their regulatory agencies as well as copies of all judicial complaints filed by other persons (including corporate or partnership entities or public interest groups).

*The East Molloy facility application for a Waste water Discharge Permit, submitted to Onondaga County Department of Drainage and Sanitation ("OCDDS"), is enclosed as Attachment #3. A copy of a Notice of Violation ("NOV") issued by OCDDS, and correspondence from OCDDS resolving the NOV, is enclosed as Attachment #4.*

14. Identify any current or previous insurance policies that may indemnify you or your company against any liability that you or any entity may incur in connection with the release of any hazardous substances and/or hazardous wastes at the Site. Please provide a copy of the policy. For any policy that you cannot locate or obtain, provide the name of the carrier, years in effect, nature and extent of coverage, and any other relevant information you may have.

*During the applicable time period General Electric had comprehensive General Liability Insurance in varying amounts. Based upon our experience with the carriers, we would expect them to deny coverage, citing "pollution exclusion" and other standard insurance defenses. If at some point GE's ability to pay becomes an issue, we will provide copies of the relevant policies.*

15. Supply any additional information that may be used to identify additional sources of information or parties involved with the Site.

*No additional information is known at this time. If such information becomes available, GE will supplement this request accordingly.*

16. State the name, title, and address of each individual who assisted or was consulted in the preparation of the response to this "Request for Information" and specify the question to which each person assisted in responding.

This information is submitted by General Electric Company as a good faith effort to be responsive to the joint request of EPA and NYS-DEC. As such, it does not constitute an admission that GE is in any way liable or responsible for any cost or expenses which EPA, NYS-DEC, or any other party may incur in connection with activities that may have been or may be undertaken at the site.

Very Truly Yours,

A handwritten signature in black ink, appearing to read "Andrew J. Thomas, Jr.", with a long, sweeping flourish extending to the right.

CERTIFICATION OF ANSWERS TO REQUEST FOR INFORMATION

State of CONNECTICUT

County of FAIRFIELD:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document (response to EPA/DEC Joint Request for Information) and all documents submitted herewith, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete, and that all documents submitted herewith are complete and authentic unless otherwise indicated. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment. I am also aware that my company is under a continuing obligation to supplement its response to EPA's and DEC's Request for Information if any additional information relevant to the matters addressed in EPA's and DEC's Request for Information or the company's response thereto should become known or available to the company.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations and state laws and regulations. If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

16. **GENERATOR'S CERTIFICATION:** I hereby declare that the contents of the bond document are for a valid account, the contents are properly packed, properly shipping name and are classified, packed, marked, and labeled and are in all respects in proper condition for shipment, and are in accordance with applicable international and national government regulations.

proper shipping name and are classified, packed, marked, and labeled according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to use the volume and the weight of hazardous waste generated (have determined to be economically practicable) and that I have selected the practicable method of management, storage, or transport available to the waste owner as the preferred future threat to human health and the environment. OR, if I am a small quantity generator, I have made good faith efforts to utilize my waste reduction and the best waste management method that is available to me and then certify:

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations and state laws and regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment: OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

Apparatus Service-Northeast Region  
 General Electric Company  
 650 Franklin St., 5th Floor  
 Schenectady, NY 12305  
 518 385- 7096

January 19, 1993

Mr. Joseph J. Mastriano  
 Program Manager  
 Department of Drainage and Sanitation  
 650 Hiawatha Boulevard, West  
 Syracuse, NY 13204-1194

Dear Mr. Mastriano:

Enclosed is the application package for discharge of industrial waste water from the General Electric Syracuse Service Center located at 5990 East Molloy Road, Syracuse.

This package includes the Baseline Monitoring Report, Industrial Waste Questionnaire, NYS DEC Industrial Chemical Survey Parts I and II and analytical reports on four (4) grab samples. Theresa Hinman contacted Dan Ramer on December 28 indicating that data from the laboratory would be late thus postponing the indicated due date of December 30, 1992 as per General Electric's October 6 letter. Mr. Ramer advised us to wait for the data and submit a complete package.

In the Baseline Monitoring Report General Electric proposes corrective action for the parameters of pH and PCBs. We are aware that PCBs are of particular concern to Onondaga County as per a phone conversation with Dan Ramer on this same date. General Electric has outlined a plan to address this issue. We look to discussing the method of corrective action with you before initiating any abatement procedures. At this time we have detained any extraneous discharges from the E. Molloy Road facility until further communication with your office.

Thank you.

Sincerely,

*Theresa Hinman*

*for* W. F. Sperry, Region Manager  
 Apparatus Service Department

County of Onondaga Department of Drainage and Sanitation

BASELINE MONITORING REPORT

1. **FACILITY:** General Electric Company  
Syracuse Service Center  
5990 East Molloy Road  
Syracuse, NY 13211  
  
**FACILITY MANAGER:** Matthew Battle  
  
**FACILITY OWNER:** Guy Easter  
Midcount Builders  
96 East Lake Road  
Skaneateles, NY 13152
2. **PERMITS:** Certificates to Operate exist for 4 sources at the facility:  
  
Sources: Small Burnout Oven  
Large Burnout Oven  
Paint Booth  
Small Bake Oven  
  
Certificates to Operate were submitted December 7, 1992 for:  
  
Source: Welding/Grinding/Cutting Room  
Large Bake Oven  
  
Application to Construct was submitted December 7, 1992 for:  
  
Source: Proposed Varnish Dip Operation
3. **DESCRIPTION OF OPERATIONS:** The Service Center repairs and rebuilds industrial equipment, principally, electric motors and circuit breakers. In order to perform these activities, the electrical apparatus is steam cleaned. Discharge from this facility is not on a continuous basis.  
  
During a steam clean operation, the rate of flow is constant with low volume and relatively short duration. Water usage for this facility averages 30,000 gallons/month with an estimate of 150-175 projects/month. Note that not each repair job requires steam cleaning.  
  
A diagram indicating all points of discharge from processes in the facility to the POTW is attached.  
  
The SIC code for this facility is 7699.

County of Onondaga Department of Drainage and Sanitation

BASELINE MONITORING REPORT

Page 2

4. FLOW MEASUREMENT: Discharge from the facility is not on a continuous basis. During a steam clean operation, the rate of flow is constant, approximately 10 gallons per minute, and relatively of short duration (20 minutes). Average daily flow is estimated at 1000 gallons.
5. MEASUREMENT OF POLLUTANTS: Four (4) grab samples were collected on four separate days from separate cleaning projects. A sampling manhole was installed outside of the building in the discharge line exiting from the facility and entering into the sewer line. Samples were drawn from this point during the flow from a typical steam clean operation. Samples were taken within the first fifteen (15) minutes of startup. During this time, domestic wastes were controlled. Results of sampling and analysis attached.
6. CERTIFICATION: General Electric proposes corrective action for the parameters of pH and PCBs in order to achieve compliance to the effluent limitations of the Rules and Regulations Relating to the Use of the Public Sewer System issued by the County of Onondaga's Department of Drainage and Sanitation.  
  
To reduce pH in order to attain discharge readings of 5.5-9.5, the detergent Jettacin made by Dubois Chemicals, Inc. will be field tested. See attached MSDS.  
  
To reduce PCBs to nondetectable levels a carbon absorption unit will be installed followed by a more intensive monitoring program of the discharge water to determine the source of contamination. This monitoring program would entail sampling the discharge water at various points along the discharge route.

County of Onondaga Department of Drainage and Sanitation

BASELINE MONITORING REPORT

Page 3

Points proposed to sample from are:

1. immediately after rinse from the apparatus,
2. after contact with the steam room trough,
3. prior to entry into the oil/water separator,
4. prior to entry into the carbon absorption unit,
5. prior to entry into the sewer line.

7. SCHEDULE OF  
COMPLIANCE:

Implementation and field testing of the new steam cleaning detergent will take place by January 30, 1993. The parameter pH will be measured from four (4) successive steam cleaning operations. A progress report will be submitted by February 14, 1993.

The carbon absorption unit to be installed by January 30, 1993 with monitoring of discharge points taking place through February 28, 1993. A progress report to be submitted by March 15, 1993.

**GENERAL DESCRIPTION:**

JETTACIN non-butylated multi-purpose cleaner is a medium- to heavy-duty, environmentally safe, liquid detergent. A unique blend of wetting and emulsifying agents plus a natural solvent give JETTACIN its superior ability to penetrate even the toughest soils. Once the bond is broken, the soil is held in suspension with no redepositing. Rinsing is rapid and complete, leaving a surface that is free from residue.

**PROPERTIES:**

Biodegradable .....	Yes (Surfactant System)
Causticity .....	No free caustic
Emulsification .....	Rapid
Flash Point .....	None to boil (Pensky-Martens Closed Cup)
Foaming .....	Medium foam
Odor .....	Mild citrus aroma
pH (1%) .....	10.6
Phosphates .....	None
Rinsing .....	Complete
Stability .....	Stable in hard or soft water
Weight .....	8.6 lb./gal.
Wetting Ability .....	Excellent

**USING PROCEDURES:**

GENERAL-PURPOSE CLEANER DILUTION: 1:40 to 1:100 with water, depending on soil conditions.

RUBBER INDUSTRY: Banbury cleaning, 1:2 to 1:20 with water, using steam or high pressure cleaning.

PETROCHEMICAL INDUSTRY: Cleaning of various spills, especially crude oil with steam or high pressure washers, 1:5 to 1:20 with water, depending on type of soil.

GLASS CONTAINER INDUSTRY: Cleaning of the hot end equipment and floors, 1:10 to 1:25 with water, using steam, foam, gel, or high pressure equipment for dispensing JETTACIN.

Similar applications are achievable in many such industries.

STEAM CLEANING: 1:15 to 1:50 with water.

DEGREASING: 1:5 with water for ordinary degreasing.

HEAVILY SOILED EXTERIOR SURFACES: 1:3 to 1:7 with water, depending on degree and type of soil.

AIRCRAFT CLEANING: 1:10 to 1:30 foam, pressure

wash, or brush.

TRUCK WASHING: 1:10 to 1:100 with water.

BUS & TRUCK: Exhaust track areas--1:5 with water.

VEHICLE WASHES: 1:20 to 1:100 with water, depending on degree and type of soil.

**DISPENSING:**

JETTACIN can be applied via FOAMALL, JEL-A-MATIC, GERNI, STEAMALL or THERMO-BLAST dispensing equipment.

**TITRATION:**

Titration Kit 100. Instruction No. 109-B.

**MATERIAL SAFETY:**

JETTACIN cleaner is safe on most common alloys such as steel, stainless steel and nickel. It can be used on most soft metals such as aluminum alloys, copper, brass and bronze as well as on most painted surfaces. (Test painted surfaces prior to application.)

**STORAGE:**

Keep container closed. If frozen, thaw to remix and use.

**PRECAUTIONS:****KEEP OUT OF THE REACH OF CHILDREN.**

Please refer to the label and Material Safety Data Sheet for all warnings, recommendations for safety equipment, and other regulatory information. Copies of labels and Material Safety Data Sheets can be ordered by calling 1-800-4-DuBois.

**ACCEPTABILITY:**

USDA authorized, Code A-8.

JETTACIN was tested according to Mil-C-87936A Type I, Boeing D6-17487 Types 4a and 4b, McDonnell-Douglas CSD-1 Types I and II and conforms to the requirements for the following:

- Immersion and Sandwich Corrosion of Metal Surfaces.
- Hydrogen Embrittlement.
- Safety on Plastic Substrates.
- Safety on Painted Surfaces.
- Flash Point.

DuBois Chemicals, Inc. • Cincinnati, Ohio 45202

# **JETTACIN**

## ***Non-butylated Multi-purpose Cleaner***

## **Contains No "Butyl Cellosolve" Or Other Hazardous Glycol Ethers.**

JETTACIN is the safer-to-use, general-purpose industrial cleaner. It contains no "butyl cellosolve" or other glycol ethers which pose a health hazard to personnel. Strong detergency makes JETTACIN particularly effective in a wide variety of applications.

### **SAFETY**

JETTACIN non-butylated cleaner is free of the objectionable chemicals which threaten the health and safety of plant personnel. The active solvent in JETTACIN is FDA GRAS-listed (generally recognized as safe). JETTACIN cleaner has no flash point and no established Threshold Limit Value (TLV).

### **PERFORMANCE**

With JETTACIN you can clean everything from heavily soiled off-highway vehicles to stained upholstery. Soil is held in suspension without redepositing, providing quick and complete rinsing and leaving surfaces free of residue.

### **VERSATILITY**

As a multi-purpose cleaner, JETTACIN has proven effective in a wide range of applications. JETTACIN will remove grease, oil, airborne soils, soot, inks, dyes and carbonaceous soils. This cleaner can be used in high pressure hand-held washers, steam cleaners or applied by

brush. It works especially well when used in DuBois FOAMALL, JEL-A-MATIC, GERNI, STEAMALL or THERMO-BLAST dispensing equipment.

### **METAL SAFE**

JETTACIN is safe on most common alloys such as steel, stainless steel and nickel. It can be used on most soft metals such as aluminum alloys, copper, brass and bronze as well as on most painted surfaces. (Test painted surfaces prior to application.)

### **ENVIRONMENTALLY SAFE**

JETTACIN contains no phosphates and its surfactant system is biodegradable, making it safe for the environment and acceptable to environmental protection authorities.

### **PLEASANT ODOR**

A mild, citrus-like aroma makes this safe-to-use product pleasant to use as well.

## INDUSTRIAL CHEMICAL SURVEY

## PART I.

Please refer to  
attached table

PLEASE COMPLETE AND RETURN TO THE ABOVE ADDRESS, ATTENTION: INDUSTRIAL CHEMICAL SURVEY.

COMPANY NAME <b>General Electric Company</b>		SIC CODE (if known) <b>7699</b>	OFFICE USE ONLY
COMPANY MAILING ADDRESS <b>5990 East Molloy Road</b>	CITY <b>Syracuse</b>	STATE <b>NY</b>	ZIP CODE <b>13211</b>
CONTACT NAME (if different) <b>Matthew Battle</b>	CONTACT NAME <b>Matthew Battle</b>	TELEPHONE Area <b>315-456-1822</b>	
STREET ADDRESS (if different) <b>Street</b>	CITY	STATE	ZIP CODE
PRINCIPAL BUSINESS OF PLANT <b>Service of electrical industrial equipment</b>			

NOTE: (If parent company, give name and addresses of all divisions, subsidiaries, etc. located in New York State. A separate questionnaire is to be completed and submitted for each.)

PART II  
Discharge Information

WATER	1. Does your plant discharge liquid wastes to a municipally owned sanitary sewer system? Name of System <u>Onondaga County Department of Drainage and Sanitation</u>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No																				
	2. Is your facility permitted to discharge liquid wastes under a State (SPDES) or Federal (NPDES) permit? Permit Number <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																				
	3. Do you discharge liquid wastes in any other manner? Explain _____	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																				
	If any of the above are "Yes": a. Do you discharge process or chemical wastes - (i.e. water used in manufacturing including direct contact cooling water and scrubber water)? b. Do you discharge non-contact cooling water? c. Do you discharge collected storm drainage only? d. Do you discharge sanitary wastes only?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No																				
AIR	1. Does your facility have sources of possible emissions to the atmosphere?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No																				
	2. Enter Location and Facility Code as shown on your Air Pollution Control Application for Permits and Certification (If applicable) <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span>																					
SOLID & CONCENTRATED LIQUID WASTES	1. List Name and Address of Firm (Including yourself) removing wastes other than office and cafeteria refuse. <table border="1" style="width: 100%;"> <tr> <td>Name</td> <td colspan="3"><b>Laidlaw Waste Systems</b></td> </tr> <tr> <td>Address</td> <td>City</td> <td>State</td> <td>Zip Code</td> </tr> <tr> <td><b>4545 Morgan Pl.</b></td> <td><b>Liverpool</b></td> <td><b>NY</b></td> <td><b>13090</b></td> </tr> <tr> <td>Name</td> <td colspan="3"></td> </tr> <tr> <td>Address</td> <td>City</td> <td>State</td> <td>Zip Code</td> </tr> </table>	Name	<b>Laidlaw Waste Systems</b>			Address	City	State	Zip Code	<b>4545 Morgan Pl.</b>	<b>Liverpool</b>	<b>NY</b>	<b>13090</b>	Name				Address	City	State	Zip Code	Active <input checked="" type="checkbox"/> Inactive <input type="checkbox"/>

2. List Location(s) of Landfill(s) owned and used by your facility. <table border="1" style="width: 100%;"> <tr> <td>1</td> <td><b>Onondaga County Transfer Facility, Rock City Road, Syracuse</b></td> </tr> <tr> <td>2</td> <td><b>Onondaga County Transfer Facility, Ley Creek Facility, 7th North St., Syracuse</b></td> </tr> </table>	1	<b>Onondaga County Transfer Facility, Rock City Road, Syracuse</b>	2	<b>Onondaga County Transfer Facility, Ley Creek Facility, 7th North St., Syracuse</b>	Active <input checked="" type="checkbox"/> Inactive <input type="checkbox"/>																	
1	<b>Onondaga County Transfer Facility, Rock City Road, Syracuse</b>																					
2	<b>Onondaga County Transfer Facility, Ley Creek Facility, 7th North St., Syracuse</b>																					
PESTICIDES	1. Does this facility: Manufacture Pesticides or Pesticide Product Ingredients? Produce Pesticides or Pesticide Product Ingredients? Formulate Pesticides? Repackage Pesticides?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																				
	2. EPA Establishment Number <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> - <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span> - <span style="border: 1px solid black; padding: 0 5px;">  </span> <span style="border: 1px solid black; padding: 0 5px;">  </span>																					

## PART III

SUBSTANCES OF CONCERN  
(Refer to attached TABLE I)

Complete all information for those substances your facility has used, produced, stored, distributed or otherwise disposed of since January 1, 1971. Do not include chemicals used only in analytical laboratory work. Enter the name and code from Table I. If facility uses a substance in any of the Classes A - F which is not specified in the list, enter it as code class plus 99, e.g. 899 with name, usage, etc.

NAME OF SUBSTANCE	CODE	AVERAGE ANNUAL USAGE	AMOUNT NOW ON HAND	(✓)		PURPOSE OF USE (State whether produced, reacted, blended, packaged, distributed, no longer used, etc.)
				CAL.	LB.	
Methylene chloride	A02		0			
1,1,1-Trichlorethane	A07	1-3	5	X		Degreaser
Dichloromethane	A99		0			
Methylchloroform	A99		0			
Benzene	D01		0			
Toluene	D02		0			
Xylene	D03	5	5	X		Varnish Thinner
Ethylbenzene	D06		0			
Vinyl Toluene	A99		0			
Phenol	F01		0			
Acetone	F99		0			
Isoprosand	F99		0			
Methyl Ettyl Ketone	F99		0			
Asbestos	G01		0			
Expoxides	G12	30	30 oz.			Repair kits
Antimony	M01	200	30	X		Welding materials
Cadmium	M04	200	30	X		Welding materials
Chromium	M05	200	30	X		Welding materials
Copper	M06	200	30	X		Welding materials
Lead	M07	200	30	X		Welding materials
Nickel	M09	200	30	X		Welding materials
Selenium	M10	200	30	X		Welding materials
Zinc	M13	200	30	X		Welding materials
Cobalt, molybdenum, titanium	M99	200	30	X		Welding materials
Tungsten, Vanadium, Iron	M99	200	30	X		Welding materials
Aluminum, Silicon, Carbon	M99	200	30	X		Welding materials
Manganese	M99	200	30	X		Welding materials

If you use chemicals of unknown composition, list trade name or other identification, name of supplier and complete information.

NAME OF SUBSTANCE	AVERAGE ANNUAL USAGE	AMOUNT NOW ON HAND	(✓)		SUPPLIER	PURPOSE OF USE (State whether produced, reacted, blended, packaged, distributed, no longer used, etc.)
			CAL.	LB.		

I hereby affirm under penalty of perjury that information provided on this form is true to the best of my knowledge and belief. False statements made herein are punishable as a Class A misdemeanor pursuant to Section 210.45 of the Penal Law.

INDUSTRIAL WASTE QUESTIONNAIRE

GENERAL INFORMATION

OFFICE USE ONLY

IND-CD \_\_\_\_\_

SIC-CD \_\_\_\_\_

PT-CATEGORY \_\_\_\_\_

IND-STAT \_\_\_\_\_

Company Name: General Electric Company  
Premises Served: 5990 East Molloy Road, Syracuse, NY 13211  
Mailing Address: 5990 East Molloy Road, Syracuse, NY 13211  
Name and title of Contact Official: Theresa Hinman, Northeast Region & Safety Specialist  
Address: 650 Franklin St., 5th Floor, Schenectady, NY Phone Number( ) 518-385-7096

PLANT OPERATIONAL CHARACTERISTICS

- 1) Average number of employees and length of work day:

<u>SHIFT</u>	<u>TIME SHIFT STARTS</u>	<u>TIME SHIFT ENDS</u>	<u>NUMBER OF EMPLOYEES PER SHIFT</u>	<u>DAYS OF THE WEEK PLANT OPERATES</u>
1st	<u>7 AM</u>	<u>3:30</u>	<u>11</u>	<u>5</u>
2nd	<u>None</u>	<u></u>	<u></u>	<u></u>
3rd	<u>None</u>	<u></u>	<u></u>	<u></u>

- 2) Brief description of manufacturing or service activity on premises:

The service center repairs and rebuilds industrial equipment, principally,  
electric motors and circuit breakers.

- 3) Type and amount of principal raw materials used per year:

<u>RAW MATERIAL</u>	<u>USED PER YEAR</u>	<u>AMOUNT ON HAND</u>
<u>Copper</u>	<u>3000 lbs.</u>	<u>800 lbs.</u>
<u>Steel</u>	<u>1500 lbs.</u>	<u>200 lbs.</u>
<u>Varnish</u>	<u>150 lbs.</u>	<u>900 lbs. in Varnish reservoir for dipping</u>
<u>Paint</u>	<u>500 gals.</u>	<u>40 gals.</u>
<u>Welding Mat'l</u>	<u>200 lbs.</u>	<u>30 lbs.</u>
<u>Flexible Insulation</u>	<u>500 yds.</u>	<u>200 yds.</u>

- 7) Describe any treatment performed on your raw (incoming) water: \_\_\_\_\_  
Incoming water goes through a steam cleaner that heats the water to \_\_\_\_\_  
approximately 180-200°F. This water is then sprayed with a high pressure \_\_\_\_\_  
hose onto the item to be cleaned. \_\_\_\_\_

WATER DISPOSAL OR USAGE

- 8) Estimate the daily amount of process water disposed or lost to:
- |                          |      |                 |
|--------------------------|------|-----------------|
| a) Sanitary Sewer System | 1000 | gallons per day |
| b) Storm Sewer           | None | gallons per day |
| c) Waste Hauler          | None | gallons per day |
| d) Land Application      | None | gallons per day |
| e) Evaporation           | None | gallons per day |
| f) Contained in Product  | None | gallons per day |
| g) Other                 | None | gallons per day |
- 9) Estimate the daily amount of water used for sanitary facilities (restroom, shower, sink, etc.) \_\_\_\_\_ 300 \_\_\_\_\_ gallons per day
- 10) Does your plant discharge any non-contact cooling water? \_\_\_\_\_ yes ☒ no  
if yes, estimate the daily discharge to:
- |                                       |       |                 |
|---------------------------------------|-------|-----------------|
| a) Sanitary Sewer System              | _____ | gallons per day |
| b) Storm Sewer                        | _____ | gallons per day |
| c) Land Applied (ditch, trench, etc.) | _____ | gallons per day |
| d) Surface Water (stream, lake)       | _____ | gallons per day |
| e) Other                              | _____ | gallons per day |
- 11) In the event of discharge to a storm sewer or surface water, has a State Pollutant Discharge Elimination System (SPDES) Permit been applied for?  
\_\_\_\_\_ yes ☒ no  
if yes, please indicate the application or permit number: \_\_\_\_\_

Matthew Battle  
General Electric Company (Apparatus Services)  
5990 East Molloy Road  
Syracuse, New York 13211

Re: **Notice of Violation--pH Excursion of 10.7 on March 1, 1993**

Mr. Battle:

Be advised that General Electric (Molloy Road) has failed to maintain compliance with the instantaneous effluent limitation for pH contained in Article III, Section 3.01, of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System. On March 1, 1993, grab samples of process wastewater collected and analyzed by your contract laboratory (Upstate Laboratories) exhibited a pH of 10.7 Standard Units. Article III, Section 3.01(c), of the Rules and Regulations requires that all wastewater discharged to the sanitary sewer be within a pH range of 5.5 to 9.5 Standard Units.

It is understood that the elevated pH level is attributed to the detergent used in steam cleaning electric motors. Further understood is that General Electric (G. E.) is currently exploring different types of detergents that can be used in the steam cleaning system to keep wastewater discharge within the pH limits of 5.5 to 9.5. At this time, G. E. will not be required to perform additional pH sampling, given the frequency of pH sampling mandated in OCDDS's letter of permission regarding process wastewater discharge dated February 15, 1993. However, be advised that G. E. must submit a status report to this office by April 2, 1993, detailing what is being done to alleviate future noncompliance with pH limitations. This status report shall also contain a time line for the installation of a concrete plug to be inserted in the clean-out of the oil/water separator 4" discharge pipe (see letter dated February 15, 1993).

The New York State Freedom of Information Law (FOIL) provides the public with access to government records, as do subpoenas for County records made relative to litigation. Therefore, information submitted to Onondaga County Department of Drainage and Sanitation (OCDDS) by a commercial enterprise may be subject to public disclosure unless it falls within a protected category or is otherwise nondisclosable pursuant to state or federal law.

Certain business information may be considered confidential if it concerns trade secrets or information which, if disclosed, would injure the competitive position of a business. This information which is obtained by OCDDS in the course of regulating use of the County sewer system may be protected from disclosure via FOIL requests. To do so, an assertion of confidentiality must be made at the time information is received by OCDDS using OCDDS guidelines. If no such request is made by a commercial enterprise, all information will be made available to the public by OCDDS upon receipt of a FOIL request. Guidelines for the assertion of a confidentiality claim may be obtained upon request to OCDDS.

Be further advised that the present sampling configuration for this facility is inadequate. Specifically, OCDDS needs a sampling point that will allow a **total plant effluent sample** to be taken. This was revealed in the March 3, 1993, follow-up inspection of your facility made by Michael Lannon and Stephen Bray of this office. It is understood that process wastewater flows into sampling manhole #1 (which was recently installed) via 2" PVC pipe. This PVC pipe is inverted downward and is elevated approximately 4' above the bottom of the manhole. Process wastewater discharges into the manhole and then mixes with sanitary wastewater in a turbulent manner. The problem with this design is that it does not allow a composite sample (for total plant effluent) to be taken in a steady flow wastestream that has been thoroughly mixed. Please note that this discharge configuration was not depicted on the original schematic you submitted to OCDDS for the sampling manhole. The present situation only allows grab samples to be taken when steam cleaning operations are actually occurring. OCDDS needs to be able to set-up automated composite samplers to obtain total plant effluent samples.

Therefore, this office is requiring that G. E. modify the sampling location such that the process wastewater and sanitary wastewater will sufficiently mix prior to discharging into the manhole. Possible remedies to this situation include: 1) rerouting the 2" PVC process discharge line to the clean-out located upstream of manhole #1, 2) rerouting the 2" PVC line to a discharge point within the building, and 3) some other type of modification such that the process and sanitary wastewater will be allowed to sufficiently mix, prior to sampling. G. E. is to submit a timeline for modifying the sampling configuration by April 2, 1993.

Hence, G. E. shall submit the following to this office by April 2, 1993:

1. A status report of what is being done to alleviate future noncompliance with pH limitations and the proposed date when consistent pH compliance will be achieved;
2. a timeline for the installation of a concrete plug to be inserted in the cleanout of the oil/water separator 4" discharge pipe; and
3. a timeline for modifying the sampling configuration such that composite samples can be obtained (in a steady flow) for total plant effluent.

The required submissions do not constitute a waiver of the requirements contained in the Rules and Regulations. This office reserves the right to seek any and all remedies available to it under Article VII--Enforcement and Penalties of the Onondaga County Rules and Regulations including, but not limited to, fines and penalties of up to \$1,000 per day per violation. Your cooperation in this matter is appreciated. Should you have any questions, please do not hesitate to contact Sandi Tuori-Bell or Michael Lannon at this office.

Sincerely,

DEPARTMENT OF DRAINAGE AND SANITATION

JOSEPH J. MASTRIANO  
Program Manager

Re: **Discharge of Treated Process Wastewater Emanating from Steam Cleaning Operations at Syracuse Service Center**

Ms. Hinman:

It is understood that on March 15, 1993, this office sent you a letter stating that the sampling configuration at General Electric-Molloy Road (G.E.) was unacceptable and had to be modified. In light of that letter and your conversations with Joseph J. Mastriano and Michael Lannon of this office, it is further understood that G.E. has completed the following: 1) a new sanitary line has been installed which shall route all sanitary wastewater into MH #1; 2) a new oil/water separator has been installed in the floor drain/grate which accepts steam cleaning wastewater; 3) this new oil/water separator discharges to the existing pretreatment system via newly installed PVC pipe; and 4) two 1,000-holding tanks have been installed in parallel to temporarily store pretreated wastewater prior to discharging into MH #1. It is further understood that process wastewater has not been discharged since mid-April 1993. Rather, G.E. is storing untreated steam cleaning wastewater (approximately 10,000 gallons) in a FRAC tank. G.E. wishes to dispose of this wastewater into the sanitary sewer.

Be advised that permission is hereby granted to discharge the above mentioned wastewater and all other steam cleaning wastewater into the sanitary sewer. This approval is contingent upon the following.

1. All wastewater from the FRAC tank and steam cleaning booth must pass-through the operational pretreatment system which consists of an oil/water separator, a 5  $\mu$  m in-line bag filter, and two 55-gallon activated carbon canisters, all in series. Wastewater from the FRAC tank will be treated in 1,000-gallon increments and stored in the holding tanks prior to discharge. Pretreated steam cleaning wastewater will also discharge to the holding tanks prior to discharging into the sanitary sewer.
2. Each 1,000-gallon batch of pretreated wastewater (from the FRAC tank and steam cleaning operations) in the holding tanks must be tested for PCBs (EPA method 608) and pH prior to discharge. Grab samples will be obtained through the sampling port/tap on each holding tank. G.E. shall employ a NYS Department of Health certified laboratory for testing

of all parameters in this transmittal. Further, all testing must be in accordance with 40 CFR 136 and amendments thereto. Sample test results must verify compliance with all effluent limitations listed in item #3 of this transmittal prior to discharging into the sanitary sewer. Test results will be submitted to this office on a monthly basis.

3. All wastewater discharged from this facility shall meet all effluent limitations and conditions promulgated in the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System. The effluent limitation for Total PCBs (EPA method 608) is non-detectable at a detection limit of .065  $\mu$ g/l. Total Toxic Organics (EPA method 624 plus Xylenes) shall have an effluent limitation of 2 mg/l.
4. G.E. shall record all batch discharges in a bound logbook which shall be kept proximal to the holding tanks. The date, time, quantity (in gallons), pH, the title and initials of the pretreatment system operator will be documented in said logbook. Be advised that the logbook shall be made immediately available to County personnel upon request for the purposes of inspection and copying.
5. Be advised that the permit sent to you on February 15, 1993, is hereby null and void. This transmittal will now serve as your discharge permit until you receive a final, fully executed industrial wastewater discharge permit from this office. The February 15 permit must be revised in order to reflect batch discharges versus continuous discharges of process wastewater.

This permit shall be valid until a revised, fully executed industrial wastewater discharge permit is issued for this facility. You will be receiving a revised industrial wastewater permit for this facility sometime in the near future. Once you receive a revised permit, G.E. personnel will have thirty days to comment on the draft and make requests for any modifications to the permit. Be advised that all requests must be in writing. If no written requests for modifications are made, the draft permit will be finalized and will be legally binding upon G.E. Should you have any question regarding this matter, do not hesitate to contact Joseph J. Mastriano or Michael Lannon of this office.

Sincerely,  
DEPARTMENT OF DRAINAGE AND SANITATION

Dear Mr. Thomas:

The Department and USEPA mailed your company a CERCLA § 104(e) request for information on July 20, 1994. In that request you were informed that questions regarding the § 104(e) process could be directed to me at (518) 457-3296. I have since changed offices and can now be reached at (518) 457-0090. I would request that any questions be directed to me at this new number.

Thank you.

Sincerely,

William G. Little, Esq.
